**FAST-DRAW 3 POSITION BOW HOLDER  
NOW AVAILABLE FROM CHERRYHILL OUTDOORS**

**GREENVILLE, PA (August 1<sup>st</sup>, 2005)** – Cherryhill Outdoors announces the release of its Patent Pending Fast-Draw 3 position bow holder. The bow holder reduces movement and fatigue, and allows the archer to hold the bow in the ready position with an arrow nocked nearly indefinitely. By having the bow in hand with the arrow on the rest the archer is never caught off guard and is always ready for the shot. Improved readiness and less fatigue allows for faster target acquisition and more accurate shot placement. The bow holder can be used while standing or sitting while attached to the user's belt and thigh, and it can be used in the sitting position while attached to the thigh and calf.

The Fast-Draw has an adjustable pocket to accommodate all compound bow cams sizes, and adjustable elastic straps to accommodate users of all sizes. The pocket is also designed to accept the narrow ends of recurve and long bows. The holders pocket is made of a flexible thermoplastic elastic material (the same material used in many vibration absorbing products) and is covered with a micro-fleece skin making it completely silent. The Fast-Draw is produced with a Mossy-Oak® New Break Up® camouflage pattern.

Although national distribution of the Fast-Draw is scheduled for late 2005; the product is currently available though archery pro-shops and retailers listed on the companies' web site and by direct sale at [www.cherryhilloutdoors.com](http://www.cherryhilloutdoors.com).
